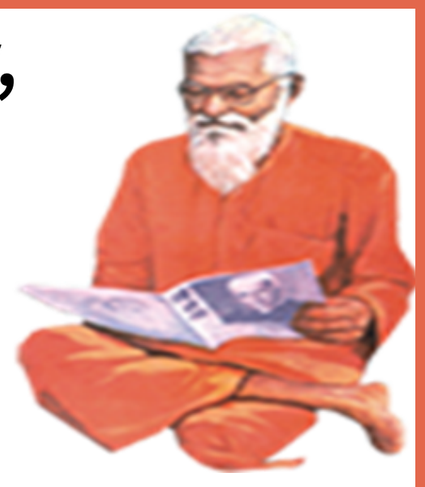
Swami Keshvanand Institute of Technology, Management & Gramothan, Jaipur

Department of Computer Science & Engineering

Project Title

SKIT/CSE/2022-26/xx



Introduction

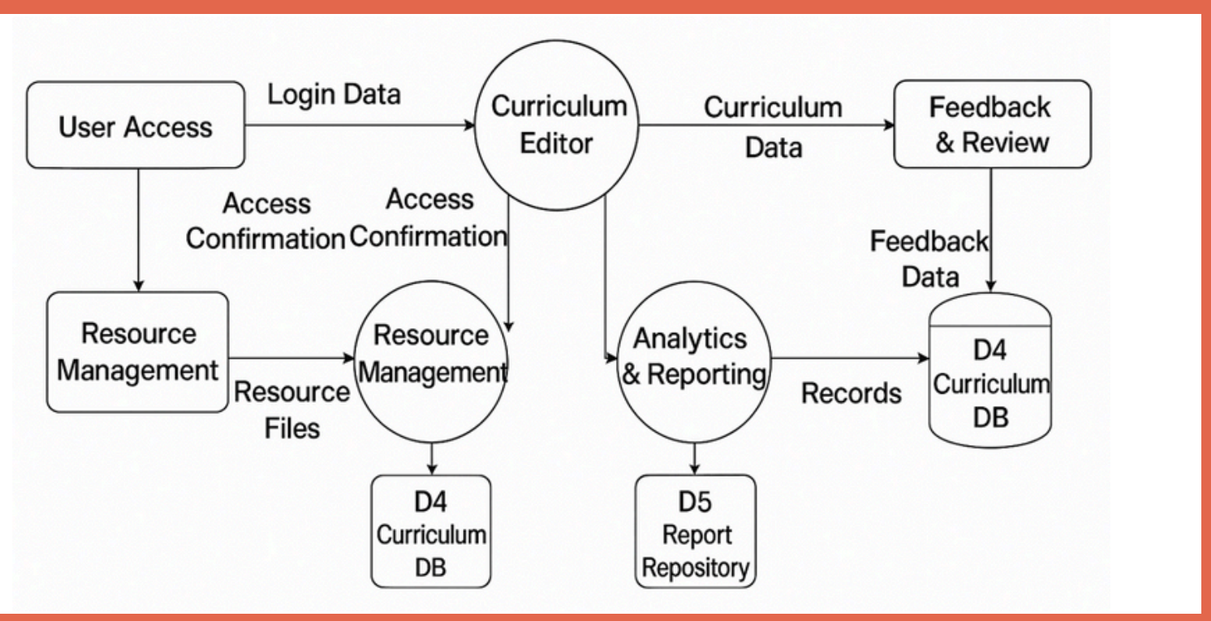
The project provides a single platform to design and manage curricula. It solves the problem of unorganized curriculum creation and helps maintain uniform education standards.

Functional Requirement

- User registration and secure login.
- Curriculum creation and management.
- Resource upload and sharing.
- Collaboration and feedback system.

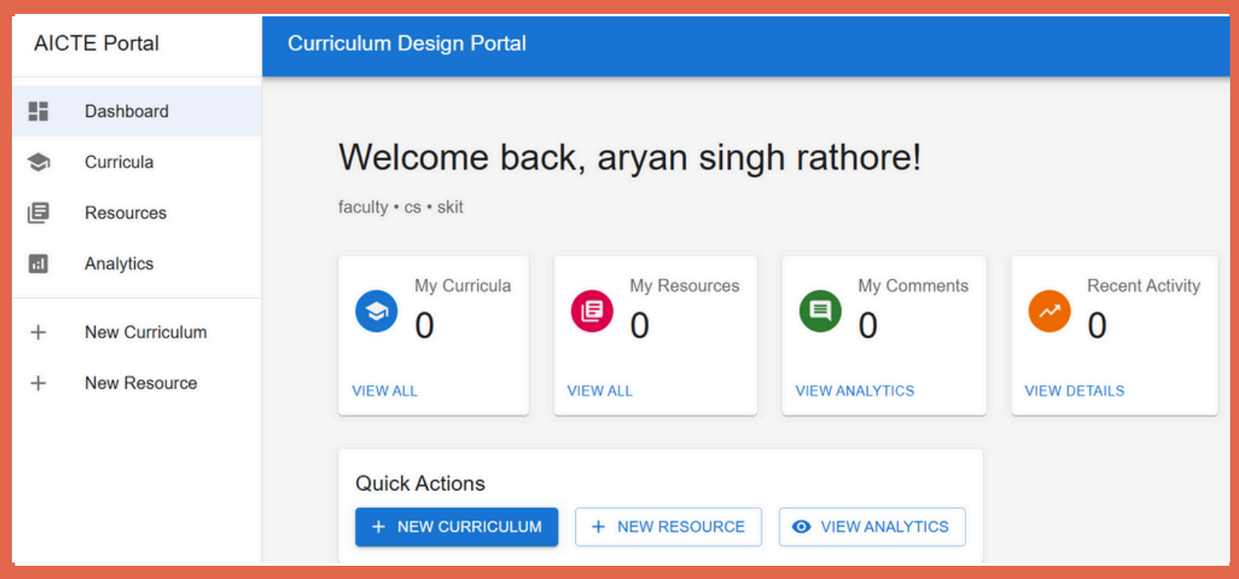
Methodology

- Studied the project requirements and planned the system design.
- Developed the front end using HTML, CSS, React and JavaScript.
- Created the back end with Node.js, Express, and MongoDB.
- Tested all modules.



Proposed Result

- A functional web portal for curriculum design and management.
- Secure login with different user role.
- Option to upload and share resources and collaboration and feedback features.



Conclusion

The AICTE project provides a single platform for creating, managing, and improving curricula, making the process easier for educators and institutes..

Future Scope

- Integration with AI-based Recommendation Systems.
- Automatic Curriculum Approval Process

Team Members

- Aryan Singh (22ESKCS043)
- Archit Sharma (22ESKCS035)
- Ayush Agrawal(22ESKCS050)
- Archit Goyal (22ESKCS034)

Mentor

Mr. Shivank Lavania
Assistant Professor, Computer Science & Engineering
